Q: Additional comments

- 1 One of the best TA's ever!!! Prompt email responses. Very helpful for learning new material and reinforcing it! Teaches material in a way that I can understand. Love her enthusiasm!!! Wsh I could give her a 110/100
- 2 too strict at homework grading
- 3 The rate of grade value is so strict. 10 questions and I had a small mistake then i got 4 of 5.
- 4 Discussion was very helpful in understanding the difficult course material presented in lecture and Ms. Aceves taught very well.
- 5 The best TA I had in any class this semester, constantly able to answer questions in a clear and concise way.
- 6 In class activities are way more helpful than Labs are
- 7 Does a good job explaining things in a way that she knows best, even when the textbook/curriculum teaches material in ways that are supposed to be taught in an 'engineering' method. Elaina does a good job of explaining topics in a way that the layman can understand a difficult concept.
