Q: Additional comments

- 1 My TA is very nice and I really enjoyed having discussion with her. She was willing to work with me for my accommodations and helped me understand the homework better. She is also funny which makes the course seem not as bad.I would DEFINITELY recommend her.
- 2 Was just wondering "How was your day today!!" :)))
- 3 I could not have asked for a better Calculus TA! She was always on time, focused during office hours/math lab hours, and she was always ready to answer questions!
- 4 She's an amazing TA that has many opportunities for us to get one on one help. Goes over great examples in class. Tests are extremely hard, Baker doesn't coordinate well with the TA's making it harder for them to prepare us. Baker doesn't let them in on anything essentially.
- 5 You are a 4.5 out of 6. Which is a C.
